Saturday, 17th November, 6.30pm

Dear Colleagues,

Mirza Ghalib, the nineteenth century "shayer", weaves the magic of his poetry on the fabric of human life and existence. His comprehensive grasp of the human predicament, the inevitability of sorrow and pain, human alienation, anomie and ennui – make him a creative genius worthy of study by mental health professionals.

The Task Force on Creativity & Mental Health invites you to an innovative programme where eminent Ghalib exponent and fellow psychiatrist Dr Ajai R Singh will decipher the master poet and also sing some of his 'shers' that are of concern and relevance to mental health on Saturday, 17th November 2018 in Mumbai.
